EXPERIENCE

PheedLoop, Inc.

Feb 2022 - Mar 2025

Full Stack Software Engineer

Toronto, ON

- Led the modernization of 5+ legacy Django template applications by migrating to React + TypeScript, reducing production bugs by 30% and accelerating feature delivery by 40%
- Redesigned the event registration experience by identifying and resolving key user friction points for a SaaS event management platform serving millions, increasing conversion by 35% while reducing support complaints by 25%
- Optimized a data-intensive event dashboard by eliminating unnecessary component re-renders and memoizing expensive computations with React hooks, reducing render time by 60%
- Led the development of a centralized Figma design system and reusable WCAG-compliant React + TypeScript component library, improving consistency across 5+ applications and reducing design-to-development handoff time by 25%
- Designed and implemented 20+ production REST API endpoints using Django REST Framework to support registration, dashboard, and administrative workflows across the platform
- Reduced hot module reload times from 2.8s to 58ms by migrating the frontend build toolchain from Webpack to Vite, cutting CI/CD build times by 80%
- Optimized Django ORM queries supporting high-volume registration traffic by eliminating N+1 database issues, reducing query times from 2.5s to 180ms
- Implemented Next.js server-side rendering and page caching for high-traffic event pages during peak event launches, reducing backend load and improving page performance by 27%
- Designed and delivered a custom registration workflow for PheedLoop's largest enterprise customer (25K+ members), enabling platform adoption through organization-specific registration workflows

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Next.js, TanStack Query, Vite, HTML5, CSS3, Tailwind CSS

Backend: Python, Django, Django REST Framework, Node.js, Express.js, RESTful APIs

Databases: PostgreSQL

Testing: Jest, React Testing Library, Vitest, Pytest

Tools: Git, Docker, Figma, Postman, Codex

PROJECTS

Spacestagram • React + Express.js Social Platform

[Source](#) | [Live](#)

- Built a full-stack social platform inspired by Instagram using React, TypeScript, Express.js, and PostgreSQL, integrating NASA's APOD API for image discovery and sharing
- Developed backend services with Express.js and PostgreSQL, implementing session-based authentication with inactivity timeout while building a responsive React + Tailwind frontend optimized for desktop and mobile

EDUCATION

Toronto Metropolitan University • Bachelor of Engineering, Electrical Engineering

Apr 2020
