## Experience

---

### PheedLoop | Event Management Software

Feb 2022 - Mar 2025

Full Stack Software Engineer

Toronto, ON

- Secured a high-value contract with PheedLoop's largest enterprise client (25K+ members) by designing and delivering a custom registration workflow
- Redesigned the event registration experience by resolving key registrant friction points, increasing conversions by 20% and reducing support complaints by 30%
- Modernized 5+ legacy Django template applications by migrating to a React + TypeScript frontend architecture, reducing bugs by 30% and accelerating new feature development by 40%
- Migrated dashboard tooling from Webpack to Vite, improving developer productivity by reducing hot module reload times from 3s to 100ms and cutting CI/CD build times by 60%
- Led a UI/UX working group to develop a centralized design system in Figma and implemented it in code, improving design consistency across 5+ production applications and reducing design-to-dev handoff time by 25%
- Implemented server-side rendering and page-level caching in Next.js to handle high-traffic event surges, reducing backend load and improving page load times by 20%
- Optimized backend API performance by eliminating N+1 query issues in Django ORM, reducing response times and lowering database load
- Built an accessible, reusable UI component library adhering to WCAG 2 standards, enhancing developer experience with consistent and scalable APIs
- Delivered full-stack features in React and Django for event planners and attendees, partnering with product and customer success teams to address user needs and improve platform adoption

## Projects

---

**Spacestagram** (React, TypeScript, Tailwind CSS, TanStack Query, Express.js, PostgreSQL)

[Source](#) | [Live](#)

- Built a full-stack web application integrating NASA's Astronomy Picture of the Day (APOD) API, enabling users to browse, like, and share images in a social media-style interface
- Designed a responsive frontend with React and Tailwind CSS, enhancing accessibility and usability across desktop and mobile devices
- Developed backend services with Express.js and PostgreSQL, implementing session-based authentication with inactivity timeout to ensure secure and reliable performance

## Skills

---

**Frontend:** React, TypeScript, JavaScript, Next.js, TanStack Query, HTML, CSS, Tailwind CSS

**Backend:** Python, Django, Node.js, Express.js

**Database:** PostgreSQL

**Testing:** Jest, React Testing Library, Vitest, Pytest

**Tools:** Git, GitHub, Docker, VS Code, Figma, Postman, Codex

## Education

---

**Toronto Metropolitan University**

Bachelor of Engineering (BEng) in Electrical Engineering

Toronto, ON

April 2020
